SEASONAL READINESS SALES EVENT

MAY-JULY 2018

SPECIAL OFFERS

Priority #1: Consistency and Quality

Although you love what you do, farming is a business. Profits are your top priority, and profits come from consistently growing, cutting and baling high-quality hay of peak nutritional value. Whether you're farming for feed or for sale, New Holland can help you choose the right tools and technology to improve hay quality, boost efficiency and maximize output—and our factory-trained technicians will make sure your equipment is always ready to take advantage of good weather windows. At New Holland, we think of ourselves as your partner in profitability. We're only successful when you're successful.

Earn Rewards on Lubricants, Coolants & Filters¹

Earn a New Holland reward card on a single purchase of any qualifying combination of genuine New Holland lubricants, coolants, filters and Fleetguard® all-makes filters. **One reward card per household.**

HAY PRESERVATION

Consistent Quality. Higher Value.

CropSaver™ Hay Preservative

Baling with CropSaver hay preservative can help make your operation more productive and more profitable. It lets you bale at moisture levels up to 30%—so you can work earlier in the morning and later in the evening, without risk of mold or spoilage. Good for all types of hay, CropSaver maintains the fresh, natural smell that livestock prefer and the higher feed value they need.

Learn more about the benefits of moisture management at www.Partstore.Agriculture.NewHolland.com/cropsaver.

Automatic and Electronic Preservative Applicators

Accuracy is important, and New Holland's highly accurate preservative applicators are always up to the task. Our effective, lower-cost electronic applicators let you manually adjust the application rate from your tractor seat, while our automatic applicators adjust the application rate automatically based on your pre-set moisture level. And now, our automatic applicators for large square balers also feature the CropRFV™ system to calculate and record the Relative Feed Value for every bale made. Below are the top 5 preferred by farmers.

PART NO.	DESCRIPTION
HT442CDS	RB electronic applicator
HT347CDS	RB auto applicator
HT4414415DS	SSB electronic applicator
HT6974533BDS	LSB auto applicator
HT6974535BDS	LSB auto applicator

Moisture Testers

Testing the moisture content of hay is essential. Wet, baled hay is at risk for molding, making it unsellable—even putting it at risk for catching fire. Trust New Holland hay moisture testers to help you manage moisture levels and avoid loss of hay value.

PART NO.	DESCRIPTION
87298951 (20-inch probe)	HT-Pro™ portable hay moisture tester with calibration clip
73343793 (20-inch probe)	Hay-core sampler
73343646 (59-inch probe)	Temperature probe
73343791 (20-inch probe)	Advanced hay straw and silage tester

MOWER CONDITIONERS

When Time Matters

Cutting Parts

SMOOTH TWIST KNIVES

Twist angle provides a close cut and high lift for superior material flow.

SERRATED TWIST KNIVES

Offers extended wear in abrasive conditions to improve cut quality.

'V' ROCK KNIVES

Arched shape provides added durability when in contact with a foreign object—ideal for operation in rocky conditions.

QuickMax™ Knife Change System

Created for use in Discbine® 313 and 316 mower conditioners and Durabine™-series disc heads, the QuickMax knife system lets you change dull or damaged blades in seconds.

PART NO.	DESCRIPTION	QUANTITY
QUICKMAX KNIFE KITS		
47945277	Model year 2015 non-lifter kit	1 per disc
47945278	Model year 2015 lifter kit	1 per disc
47945279	Model year 2014 non-lifter kit	1 per disc
47945281	Model year 2014 lifter kit	1 per disc
TOOL AND STORAGE LOCATION		
47408404	Quick-changing tool storage bracket	1 per machine
84190453	Quick-changing tool	1 per machine

ShockPro™ Protection System Hub Kit

Upgrade your disc mower with a shock protection system hub kit to take advantage of:

- Shock protection for individual cutter bar modules
- Kits reduce the number of splines, which will shear off before cutter bar gear teeth fail
- Clamp loading drives the disc after shearing to prevent domino-effect failures

UPGRADE KIT

Kit includes two shock protection modules; fits 600 series and 1400 series (prior to H7000) and late-model disc heads.

Part No. 87602273

REPAIR KIT FOR MOWMAX™

Repair kit for one shock protection module; fits H6000 disc mowers and H7000 disc mower conditioners.

Part No. 87580643

REPAIR KIT FOR MOWMAX II

Repair kit for one shock protection module; fits 313/316 Discbines and 416/419 Durabines.

Part No. 47422576

BALER KITS & NET WRAP

Baling Efficiency

Baler Kits

New Holland baler kits include everything you need to keep your baler in peak working condition— and get back in the field faster.

PART NO.	DESCRIPTION
SMALL SQUARE BALERS	
84204817	Knife kit—twine
86608973	Bale counter
87012132	Plunger knife kit with hardware & shims
87299045	Wheel bearing kit

PART NO.	DESCRIPTION
LARGE SQUARE BALERS	
84056505	Rotor-cutter knives (individuals)
84058219	Rotor-cutter knives (individuals)
87298482	Twine needle roller kit
87645121	Twine bill hook assembly
87298480	Pickup reel tine bar bearing kit

FastNet™ Black Net Wrap

Designed for use in most round balers, FastNet open-mesh, plastic black bale wrap provides superior coverage because it keeps its shape and doesn't get narrower as it's stretched. FastNet completely binds bales from end to end, helping to keep the bale densely wrapped and more weather resistant—for higher-quality hay.

- Tight wrap means water is quickly shed off the bale
- Springs off the bale for easy removal and hassle-free feeding
- Resists punctures and tears for safe and reliable transport

See all of your net wrap options at www.Partstore.Agriculture.NewHolland.com.

ATTACHMENTS & CAB COMFORT

New Holland Helps You Get More Done

Attachments

New Holland has a full range of attachments to help you get the job done. See them all at www.Partstore.Agriculture.NewHolland.com.

LOADRITE S1100A WEIGHING SYSTEM

S1100A scales can help you accurately weigh and measure feed, hay bales and stock items that are handled via tractor or skid steer. With weight measurements available in the cab, you can better control the quality, quantity and costs of hay bales and other stock materials in your operation. Part No. ZTNAS1100ASYS

10% INSTANT REBATE!

Terms and conditions apply. Ask your dealer for details.

BALE CLAMP

Ideal for moving, stacking and loading large film-wrapped bales (round and square)—“squeeze” design ensures film seal remains unbroken.

Part No. 87381817

PALLET FORKS

New Holland pallet forks are specifically designed for your New Holland equipment to provide optimal forward tilt and rollback. Back guard design ensures high visibility, allowing the operator to accurately position forks for pick-up and load placement every time.

Safety Options

4.3" OBSERVATION MONITOR KIT

Featuring a bright, heavy-duty, IPX6-rated 4.3" display, this unit is perfect for skid steers where the operator is seeking a rear-view camera option. This kit is capable of connecting up to three cameras.

Part No. ZAEVOM43HDCL1B

LED WORKLIGHTS

Improve visibility and increase safety with our broad range of LED worklights and warning lights. Our wide selection of high-performance lighting spans a variety of shapes, sizes and colors.

See all of our LED lighting options at www.Partstore.Agriculture.NewHolland.com.

MAINTENANCE & REMAN

Earn Rewards on Lubricants, Coolants & Filters!*

The more you buy, the bigger your reward—offer valid on qualifying purchases.

*See page 2 for more details.

Lubricants

Only New Holland lubricants are made and tested to perform under the toughest conditions, providing superior protection throughout the service interval. This engineering design applies to Tier 4 engine technology and legacy models—so you only need one set of lubricants for all of your equipment. Look for:

- Unitek™ MasterGold™ Engine Oil (Synthetic)
- MasterGold Engine Oil
- MasterTran™ Ultraction™ Hydraulic/Transmission Fluid
- ActiFull™ OT Extended-Life Coolant

New Holland lubricants are engineered specifically for New Holland machines. Learn more at www.Partstore.Agriculture.NewHolland.com/lubricants.

Filters

New Holland filters are made with MicroLoc™, a multi-layer, gradient-density synthetic media that outperforms competitive cellulose and paper media 2-to-1—delivering up to 89.8%** more fine-particle protection than will-fit. Look for:

- Air filters
- Lube filters
- Fuel filters
- Hydraulic filters

New Holland filters perform when the others can't. See why at www.Partstore.Agriculture.NewHolland.com/filters.

**Calculated comparing a CNH Industrial 15-micron lube filter to a 15-micron competitive lube filter (99.1% vs. 52.2% efficiency)

Reman—It's Not Rebuilt, It's Reborn.

Get maximum performance and more money in your pocket with New Holland remanufactured parts. They're more reliable than a rebuild and more precise than will-fit—because they aren't just close to OEM specs, they are OEM specs.

To see all of your remanufactured options, go to www.WhyReman.com.
